**ETHICS CONSULT SERVICE
INTAKE Note
GROSSE POINTE CAMPUS****ECS members:** Edmund Neumaier
Response time to request: 20 hours**Today's Date** 11/3/2016**PATIENT****Name:** [REDACTED] AS**MRN** [REDACTED]**Age:** [REDACTED]**Sex:** female**Unit:** 3 West**Admit Date:** 11/1/2016**LOS:** 2**STAFF****Primary Care Provider:** Alrais, Mark**Attending Provider:** Alrais, Mark**Current Clinical Service:** Medical**Background**

Attending physician on record has been notified of the consult. Yes

Requestor's reason for consult: "frequent recurrent admissions (27 admissions this year), malnutrition, chronic pain, medication use, non compliant diabetic".

Patient's Current Code Status: Full Code**Patient's decision making capacity (DMC) assessment:** Decisional**Advance Directive Type:** Patient does not have AD

Comments by ECS member:

Pt's surrogate/spokesperson, relation to pt. And contact number: Patient lives with her mother**Relevant Personal Factors:**

Has a family meeting been held or scheduled? Attending physician reports having had several family meetings addressing concerns regarding patients non-compliance with her treatment plan Family members asked to Encourage patient to actively participate and adhere to her treatment plan.

Other support services (SW, PCare, Spiritual Care, etc) previously consulted: She has been seen multiple times by three different psychiatrists during her inpatient admissions, along with Social Work. All feel she would benefit from on going mental health services. Patient does not believe this would benefit her and feels her family, and her pastor are adequate support.

Patients attending reports that he has sent her to UofM, and Beaumont RO for specialty evaluations.

Relevant medical background is a o.AA female with multiple medical problems including uncontrolled diabetes mellitus, type 1, chronic abdominal pain, gastroschisis, status post PEG insertion, frequent admissions with DKA, elevated blood glucose admitted on 11/1/16 with abdominal pains, nausea, and elevated blood glucose > DKA.

Ethical Analysis: The patient has multiple comorbid conditions, that are further complicated by psychiatric/social issues, and poor compliance. The patient is receiving comprehensive management of her complex medical conditions, and has repeatedly refused mental health follow up. Staff expresses concern for the patient's welfare and struggle with their efforts to engage patient in her plan of care.

Summary Statement: Discussed with RN, attending physician, and 3 West nurse manager. Full consult note to follow.
