Transportation needs: ☒ Ambulance ☐ Wheelchair Van
☐ Family ☐ Other

Next Hospital Level of Care: ☐ RMF/RSF ☐ IPR ☐ Progressive
☐ IP Psych ☐ Other ☐ Not Applicable

Agreement with plan: ☐ Patient ☐ Family
☐ Legal guardian ☐ Other

Obstacles / Barriers**Comments / Summary**

Writer received a vm last night, obtained for review re: d/c planning for patient. Patient requires 2 weeks of iv Vanco at home. PICC line will be required. Writer has identified WITH LOVE HOME CARE @ 586-2-1111, as current home care agency of record. I spoke with them yesterday. I will confirm this morning that they are able to manage home iv abx tx. If PICC line inserted, confirmation of IV abx arranged through BHI; and d/c written and AVS completed. Patient could potentially d/c home today. If writer in house, I could assist, however CCS Nursing should work with family to arrange a workable transport time. We will need to monitor resp status at time of transfer; patient has been on trach collar during the day, vent at night. If trach collar is in use at time of transfer ACLS ambulance with appropriate O2 support, would only be needed. Monitor for need for vent transport home. D/C plan (proposed)- to home via ACLS ambulance, to the [redacted] address, Detroit; iv abx. If d/c not possible today; W/E CM Dept is staffed and available to assist x 6330. I will work to confirm all of the above before the end of my work day. ADDENDUM; writer spoke with son,

He is unsure that With Love HC is the agency of record, despite their confirmation to me yesterday. I have asked the agency to contact me. Son will re-contact writer, if not I will contact him at 1200. He is aware of writer's work hours, and request to confirm above agency details.
