Linda,

Attached are the documents to observe Dr. Brewster. Sorry for the delay in getting back to you. I really appreciate this and look forward to this opportunity.

Thanks,

Matthew Marquart DO

I spoke with Dr. Bishai and he said he does need to use Ibalance for his procedure on 6/26. He also added that Osferion is not needed. Therefore, I approve the Ibalance for this case.

Of course, that would help. (SORRY!!!!—argh!!).
Patient is Ms.

Thanks.

Subject: Wound Class question

Hi all,

I am not sure who to send this question. I was looking at the culture from a surgical case (to make sure this could not be a surgical site infection), and checked the OR log. This was a TAH, RSO surgery done on 3/29. Dr. Suzanne Hall's note of the surgery identified an abscess that was found and inadvertently "unroofed" causing spillage of pus.

The Wound Class is stated to be "Clean".

Can someone check with Dr. Hall, to clarify the correct Wound Class for this surgery, please?

Thanks.

Laura
