Active Multi-Disciplinary problems:
Normal Newborn [5768830] (6/12/17)
Phototherapy [5780730] (6/13/17)

RN started triple phototherapy as ordered. Infant in bassinet placed under pre warmed radiant warmer with ISC probe in use and warmer set at lowest setting of 35 degrees. Diaper and eye shield in place. Pacifier in use for comfort. Mother educated on all equipment and instructed to contact RN for next feeding assistance with breastfeeding and using bili blanket. She verbalized agreement to all.
