Subject: Stroke Champions for EC
Attachments: Stroke Unit Champion committment rev 2-27-17.docx

Please see message below from Cathleen Solecki for a little more detail on what is expected of our Stroke Champions.

The online training is optional. It is a presentation that I had done in the past that we had videotaped. There are 2 lectures, one on Neuro A & P/Assessment and the other on Stroke Care. You get 1.75 CME for both presentations.

What is required is that you attend one Stroke Team meeting annually (we meet the first Thursday of every month in the Private DR) in addition to helping out with providing stroke risk assessments (I can review with you) and bp checks. This would be helping out once annually.

Also the stroke champion meets are held once per month. I am hoping to tweak the time frame based on the majority of the stroke champions schedules, but this might mean that you would need to adjust your schedule around these meetings. Since we are not restarting again until next month, we are hoping to have the stroke champions attend at least 5 out of 8 meeting for the remainder of the year.

Your role in the EC would be to encourage your colleagues to complete the swallow screen on all potential stroke/TIA patients and obtain feedback from staff on suggestions for improving care at the bedside for stroke patients. This could be helping to improve our turn around times for CT, lab, and CXR.

Feel free to call me with any further questions at ext. 1817.

Thanks
 Cathleen
